

## e-ImageData to Give Away ScanPro® 2200 Scan Station at ALA MidWinter

Attendees can enter the drawing to win a new automatic fiche scanning station

Hartford, Wis, February 6, 2018—e-ImageData, the worldwide industry leader in innovative micrographic film equipment, will showcase the ScanPro® 2200 Scan Station at the ALA MidWinter show, February 9-12 in Denver, Co, Booth #2130. The scan station utilizes our latest innovation, the AUTO-Fiche™ Carrier (AFC), which allows users to automatically scan microfiche.

A ScanPro 2200 Scan Station provides easy-to-use tools to speed up the process of locating the information that users are looking for, making research easier and more efficient than ever before. Users can automatically scan, print and save images, groups of images, a range of images or all the images on the microfiche making the scan station both a research tool and a desk top conversion tool – all for a price under \$6,500.

The ScanPro Scan Station can ship directly from the factory bundled with any current ScanPro model that incorporates the AUTO-Fiche Carrier (AFC) that automatically scans microfiche. Start with the model that has the features you need for your application and bundle with the AFC and you have a scan station for microfiche scanning. Moreover, in addition to fiche scanning capability, any ScanPro Scan Station can also include a Roll Film carrier. This makes the ScanPro Scan Station the only automatic desktop scanning solution for all film types.

"We are excited to provide a product like the ScanPro Scan Station that includes advanced scanning features not available on any other product on the market – and at a very affordable price," says Jim Westoby, president of e-ImageData.

As the leader in the industry, e-ImageData's ScanPro line is backed by a new three-year product warranty to confirm the company's commitment to supplying the best microfilm scanning equipment on the market.

Visit e-ImageData at Booth #2130 at the ALA MidWinter to experience the ScanPro 2200 Scan Station and enter to win one.
